

Ecogreen  
Fuel and Engine Saver

# Ecogreen Fuel & Engine Saver

## Applications:

- For use in all petrol, 2 stroke, 4 stroke, and diesel engines.
- Can be used in all motor vehicles, garden equipment, industrial machinery and boat motors.

## Customer:

- Owners and operators of motor vehicles, motorised garden equipment, (such as mowers, and chainsaws) or boats with inboard or outboard motors.
- Any business with fleet vehicles, petrol or diesel driven equipment.

## Usage:

- Ecogreen Fuel and Engine Saver is added to the fuel tank prior to filling.
- Ecogreen Fuel and Engine saver is added at the ratio of 1 to 4000. Therefore 15ml will suffice for the average 60-litre family sedan fuel tank.

## Benefits:

- Removes water from fuel by enabling the fuel and water to emulsify; this prevents an interface from forming between the two liquids, as this is where undesirable bacteria grow.
- Unblocks ejectors and eliminates black smoke.
- Improves fuel efficiency.
- Cleans engines and improves performance.
- Cannot be overdosed.
- Safe and easy to use.
- Does not contain hydrocarbons.
- Will not alter the Octane or Cetane levels in the fuel and therefore will not void the engine or fuel warranty.

## Pack Size:

- 1 Litre and 250 ML containers
